Subject: Be smart about how we clean up the river

I agree that we need to clean up the river. There has been considerable work done to determine a way to do this that is effective in meeting the goals of a clean river while being cost effective for such a large undertaking. The more expensive proposal by the EPA is not better. The effect on our citizens and local business is significant. We need to have a healthy river and a healthy economy. I trust that you'll make the smart decision.

Sincerely,
